DATA SOURCES AND METHODS

This working paper presents a comprehensive analysis of population trends in Buffalo and Erie County based on recently released data from the 2000 Census and existing 1990 Census data.

The recently released 2000 Census data includes information on total population and population by race and Hispanic origin at geographic levels including the County, Minor Civil Divisions (Cities and Towns) within the County, and all Census Tracts in Erie County.

Data for this report was analyzed at both the Minor Civil Division and Census Tract level of geography. The Minor Civil Division geographic division is a standard Census reporting area that generally reflects local governmental jurisdictions but may include smaller townships and other places within its boundaries. Census Tracts are smaller geographic units that are located entirely within specific a Minor Civil Division.

Major findings are reported for Erie County and its Sub-areas, including the City of Buffalo and the Erie County Suburban and Rural area (both Inner Suburbs and the Outer Suburban and Rural area). The Erie County Suburban and Rural area includes all of Erie County except the City of Buffalo. The Inner Suburbs sub-area includes the Minor Civil Divisions (cities and towns) immediately adjacent to the City of Buffalo, including: Amherst, Cheektowaga, Lackawanna, Town of Tonawanda and West Seneca. The Outer Suburban and Rural sub-area includes all of Erie County except for the City of Buffalo and the Inner Suburbs.

Information from the 1990 and 2000 Censuses are generally compatible; however, the 2000 Census utilizes a new method of race classification that allows respondents to identify themselves with one or more race. Therefore, population by race in the 2000 Census can be tabulated in two manners. First, population by race can be reported as those persons reporting one racial category and the aggregate of those persons reporting two or more races ("multiracial"). Second, population by race can be reported as the number by race alone or in combination with other races; however, this method of reporting yields more responses than persons since "multiracial" persons can report identification with two or more races.

With the exception of Finding 3 and the supporting data in Appendix A, population by race data in this report is presented under the first method mentioned above using the new "multiracial" race category. In this report, the Non-White population includes the "multiracial" population and excludes those identified as White alone,

Comparing data for population by race from 1990 to 2000 must be done carefully due to the changes in the 2000 Census survey. In particular, the addition of the "multiracial" identification option may overstate losses in a particular race group between 1990 and 2000. For example, if a certain number of persons who identified themselves as "White" in 1990 later identified themselves as multiracial including "White" in addition to one or more races in 2000, the "White" population might show a decrease as these persons are included in the new "multiracial" category.

Hispanic Origin is independent of race; therefore, persons of Hispanic Origin may be of any race.

Each finding is supported by data tables, charts and maps located immediately after the "Findings" page. Complete 1990 and 2000 data tables for Minor Civil Divisions (Cities and Towns) and Census Tracts are located in the Appendices.

SUMMARY OF FINDINGS

FINDING 1: The total population of Erie County, the City of Buffalo and the Inner Suburbs decreased from 1990 to 2000; however, the Outer Suburban and Rural area experienced modest growth.

FINDING 2: The population of Erie County is sprawling away from both the City of Buffalo and Inner Suburbs toward the Outer Suburban and Rural area.

FINDING 3: The City of Buffalo has a significantly more diverse population than Erie County as a whole, while the Suburban and Rural portion of the County is less diverse than the County as a whole.

FINDING 4: Population diversity is increasing in Erie County, including the City of Buffalo and the Inner Suburbs: the White Population of Erie County decreased from 1990 to 2000, although the Outer Suburban and Rural area of the County gained White residents. The Non-White population of Erie County increased, primarily within the City of Buffalo and the Inner Suburbs.

FINDING 5: Patterns of gains and losses in population by race by Census Tract suggest sprawling movement of the White population, movement away from core areas of the City of Buffalo by the African-American population, and growth in the Hispanic population on the west side of Buffalo.

FINDING 6: Most residents of Erie County and the City of Buffalo live in racially or ethnically segregated Census Tracts.

FINDING 7: More than a third of Census Tracts in the City of Buffalo experienced a significant change in racial or ethnic composition from 1990 to 2000.

FINDING 8: Racial and ethnic segregation in Buffalo and Erie County has improved only slightly from 1990 to 2000, despite significant population movement.

FINDING 1: The total population of Erie County, the City of Buffalo and the Inner Suburbs decreased from 1990 to 2000; however, the Outer Suburban and Rural area experienced modest growth.

Erie County experienced a modest decline in total population from 1990 to 2000.

The population of Erie County fell from 968,584 in 1990 to 950,265 in 2000, a decrease of 18,319 or 1.9%.

The City of Buffalo lost population at a more rapid rate than Erie County between 1990 and 2000.

Population in the City of Buffalo fell from 327,931 in 1990 to 292,648 in 2000, a loss of 35,283 or 10.8%.

The Suburban and Rural portion of Erie County experienced modest growth; however, Inner Suburbs lost population while the Outer Suburban and Rural area gained population, indicating a sprawling pattern of population distribution.

The Suburban and Rural portion of Erie County rose in population from 640,653 in 1990 to 657,617, an increase of 2.6%.

The population of the County's Inner Suburbs (Amherst, Cheektowaga, Lackawanna, Tonawanda and West Seneca) fell from 362,089 in 1990 to 353,668 in 2000, a decrease of 2.3%. Among the Inner Suburbs, only Amherst experienced growth, moving from 111,725 residents in 1990 to 116,510 in 2000.

Nearly all of the population growth in the Suburban and Rural portion of Erie County took place in the Outer Suburbs and Rural area which gained more than 25,000 residents, growing from 278,564 persons in 1990 to 303,949 in 2000, an increase of 9.1%.

The population reported in the 2000 Census for the City of Buffalo is consistent with previous Census estimates from 1991 to 1999; however, 2000 Census data for other cities and towns reflect unanticipated gains and losses.

The population of 292,648 for the City of Buffalo reported in the 2000 Census is consistent with the year-to-year population estimates for 1991 to 1999 that indicated an annual loss of three to five thousand residents.

Lancaster, Hamburg, Orchard Park, Amherst and Clarence experienced population gains at a faster rate than suggested by annual Census estimates.

Tonawanda Town, West Seneca and Cheektowaga all experienced population loss at a faster rate than suggested by annual Census estimates.

CHART 1A
Change in Total Population for Erie County and Sub-areas, 1990 - 2000

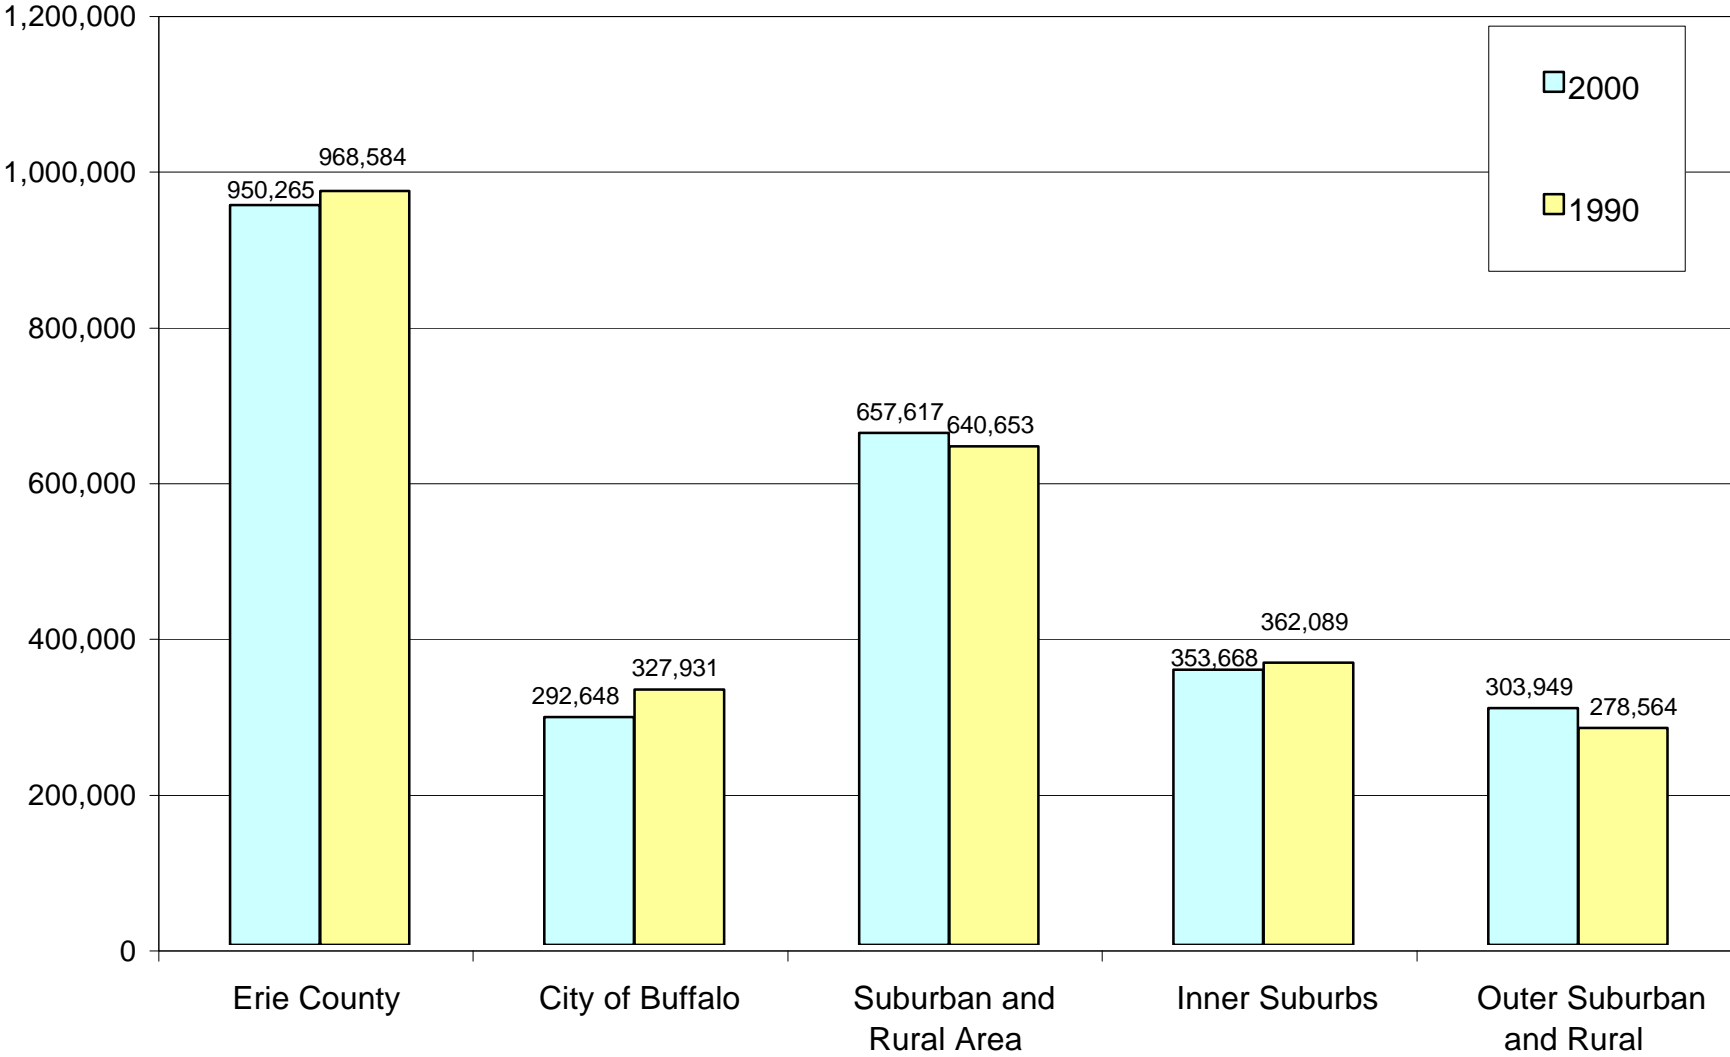

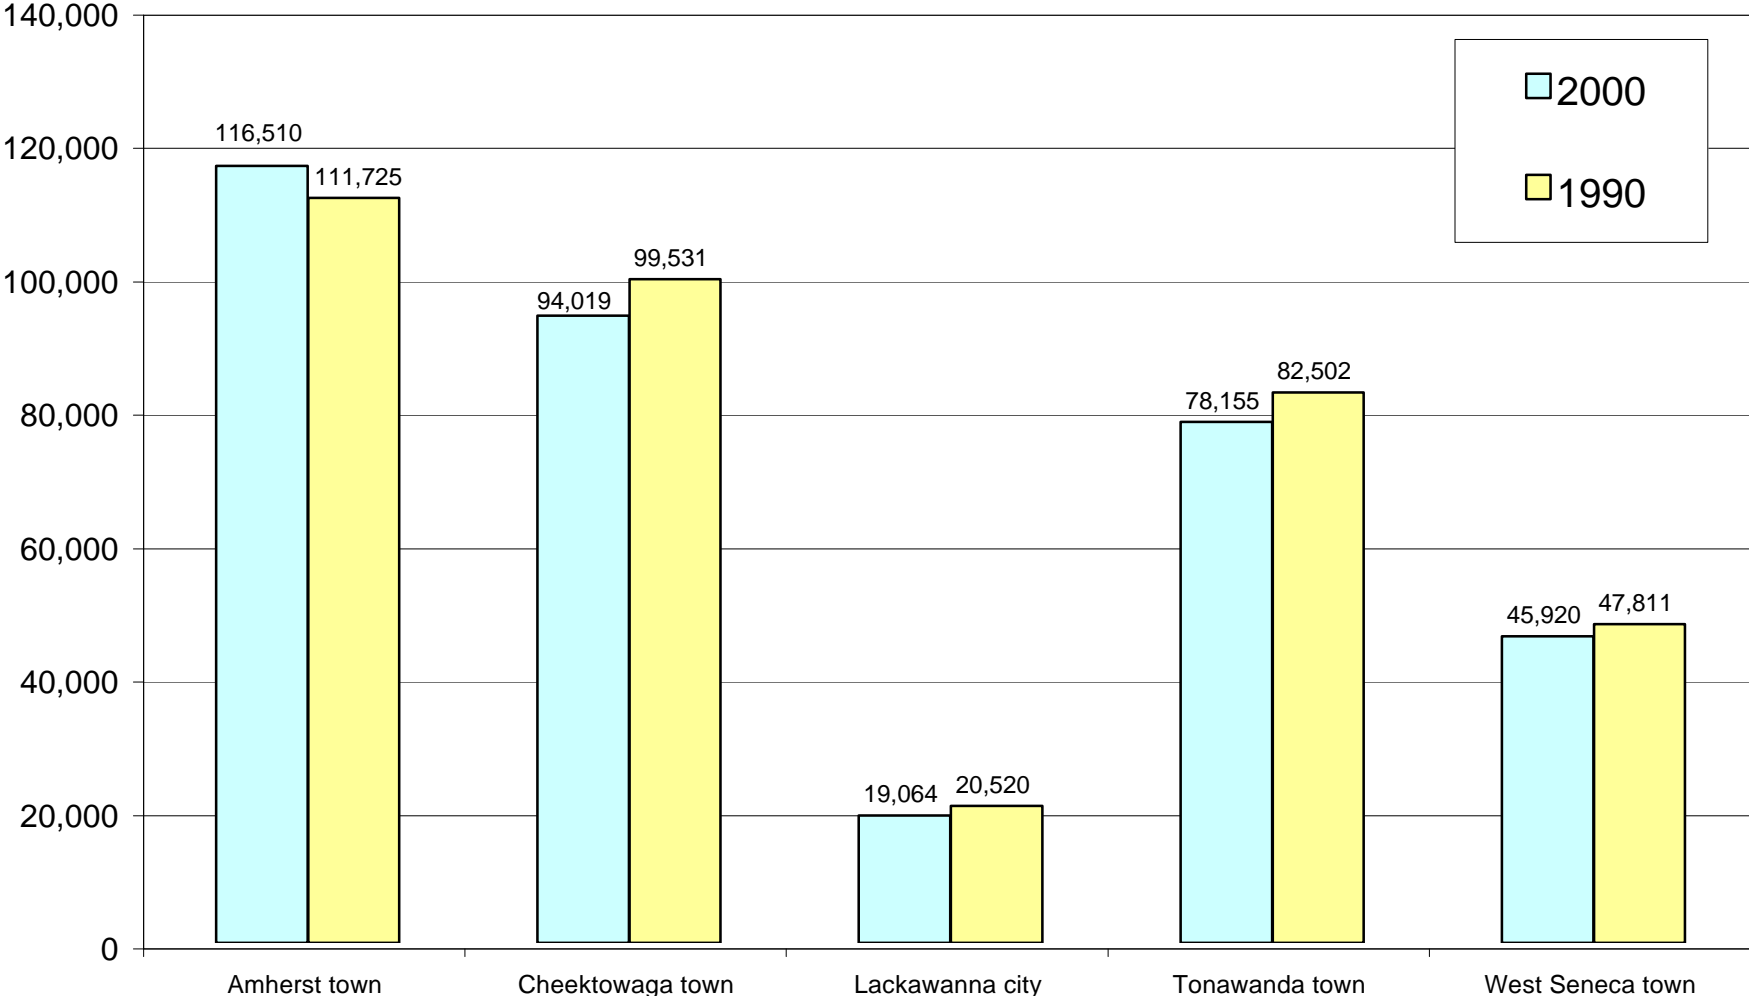

CHART 1B
Change in Total Population for Inner Suburbs of Erie County, 1990 - 2000

FINDING 2: The population of Erie County is sprawling away from both the City of Buffalo and Inner Suburbs toward the Outer Suburban and Rural area.

The proportion of Erie County residents living in the City of Buffalo and Inner Suburbs declined from 1990 to 2000, as the Outer Suburban and Rural area of the County gained share of population.

In 1990, the City of Buffalo held 33.9% of Erie County residents, while Inner Suburbs held 37.4% and the Outer Suburban and Rural area held 28.8%. By 2000, the Outer Suburban and Rural area increased its share of the County population to 32%, while the City of Buffalo's share of population fell to 30.8% and the Inner Suburbs' share of population held nearly steady at 37.2%.

Within Erie County, the population is moving from the City of Buffalo and Inner Suburbs toward Outer Suburbs.

All but 12 out of 90 Census Tracts within the City of Buffalo experienced population loss.

Most areas within Inner Suburbs also experienced population loss. All Census Tracts within Lackawanna lost population and only one Census Tract within the Town of Tonawanda. Within West Seneca, 8 of 11 Census Tracts lost population and 20 of 23 Census Tracts within Cheektowaga lost population. A majority of Census Tracts within Amherst increased in population.

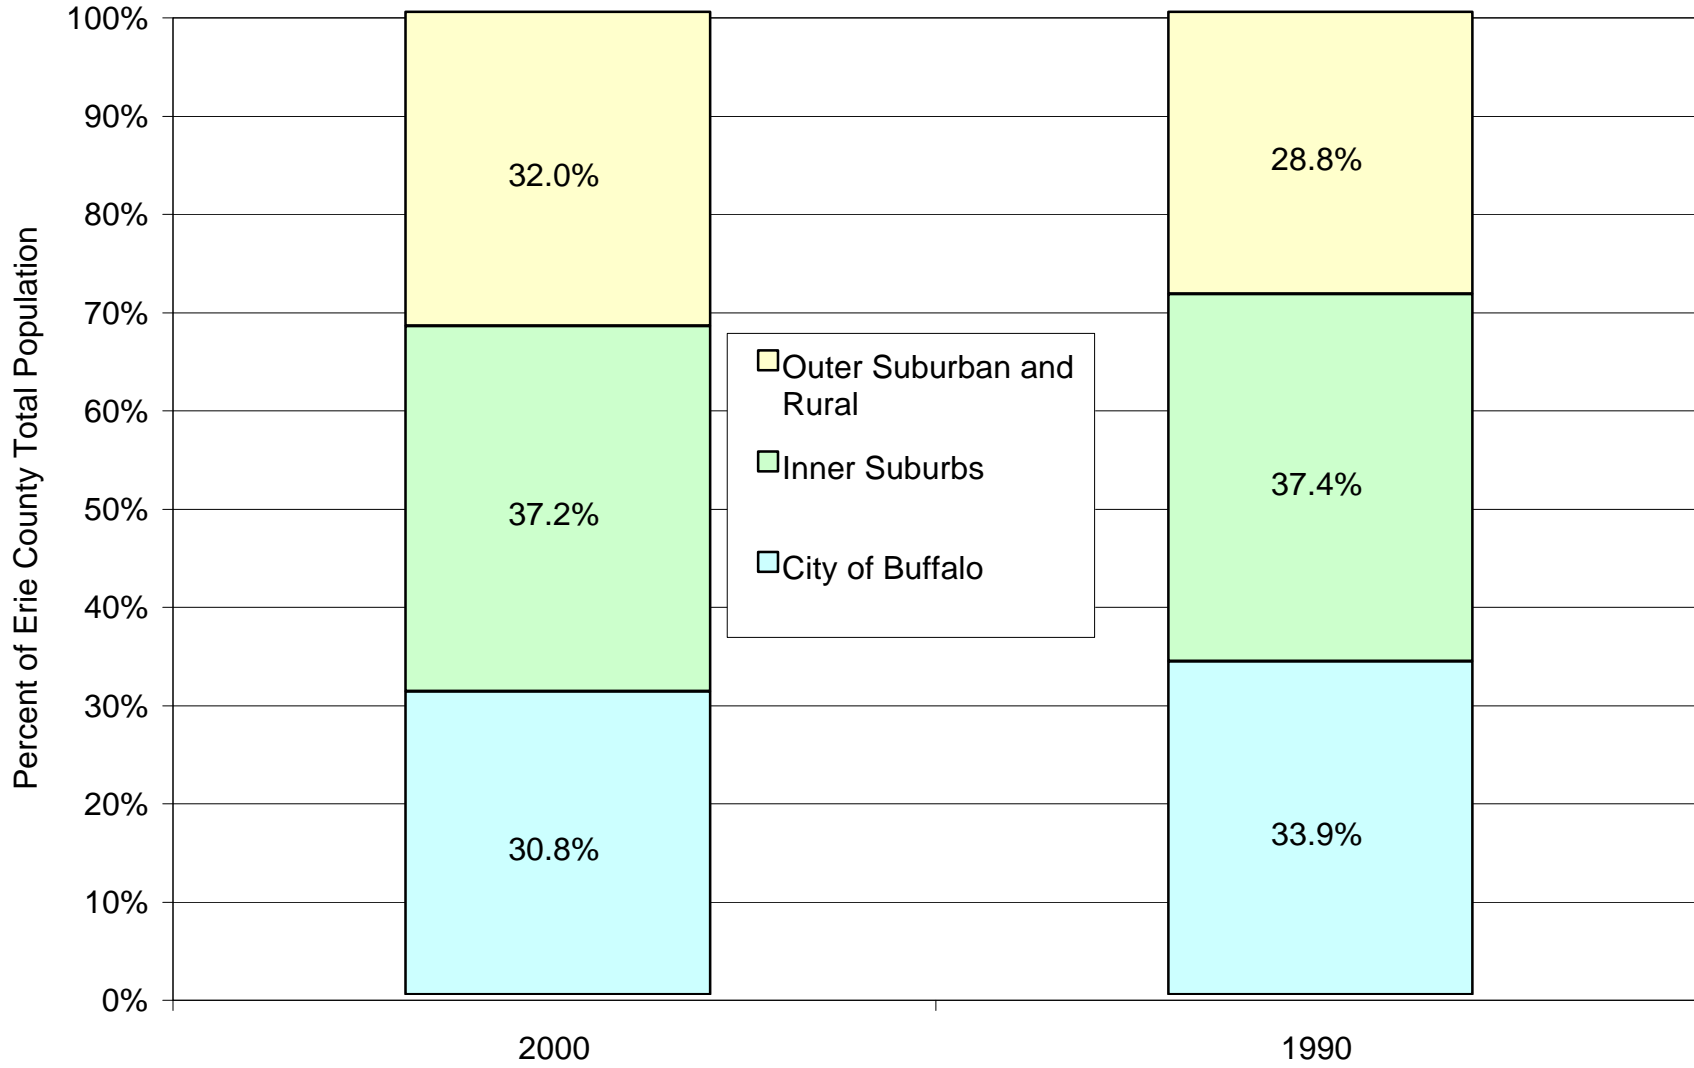

Population growth in the Outer Suburban and Rural portion of the County was directed toward the eastern region of the County – including Clarence and Lancaster – and toward southern areas, such as Hamburg and Orchard Park.

Erie County, NY

FINDING 3: The City of Buffalo has a significantly more diverse population than Erie County as a whole, while the Suburban and Rural portion of the County is less diverse than the County as a whole.

Population diversity within Erie County.

The 2000 Census data for population by race indicates that 82.18% of Erie County residents identified themselves as White-only, while a total of 83.25% of residents identified themselves as either White-only or White in combination with one or more additional race.

31,054 persons in Erie County are of Hispanic Origin, including 13,266 White persons of Hispanic Origin.

The City of Buffalo is significantly more diverse than Erie County.

Within the City of Buffalo, 54.43% of residents identified themselves as White-only and a total of 56.24% of residents were either White-only or White in combination with one or more additional races.

The Non-White population of the City – those choosing only one race other than White - comprises 45.57% of all residents. 46.41% of City residents are either Non-White or chose White in combination with one or more additional races.

22,076 persons of Hispanic Origin live in the City of Buffalo, including 7,850 White persons of Hispanic Origin.

49.09% of the population in the City of Buffalo identified themselves as either Non-White (either alone or combination with another race) or as White and of Hispanic Origin.

The Suburban and Rural area of the County is less diverse than Erie County as a whole.

While 82.18% of all Erie County residents identified themselves as White-only, 94.53% of residents of the Suburban and Rural portion of Erie County identified themselves as White-only.

5.47% of Suburban and Rural residents identified themselves as Non-White and 5.59% of the Suburban and Rural population chose a Non-White race alone or chose White in combination with one or more additional races.

8,978 of 657,617 of suburban residents are of Hispanic Origin, including 5,616 White persons of Hispanic Origin.

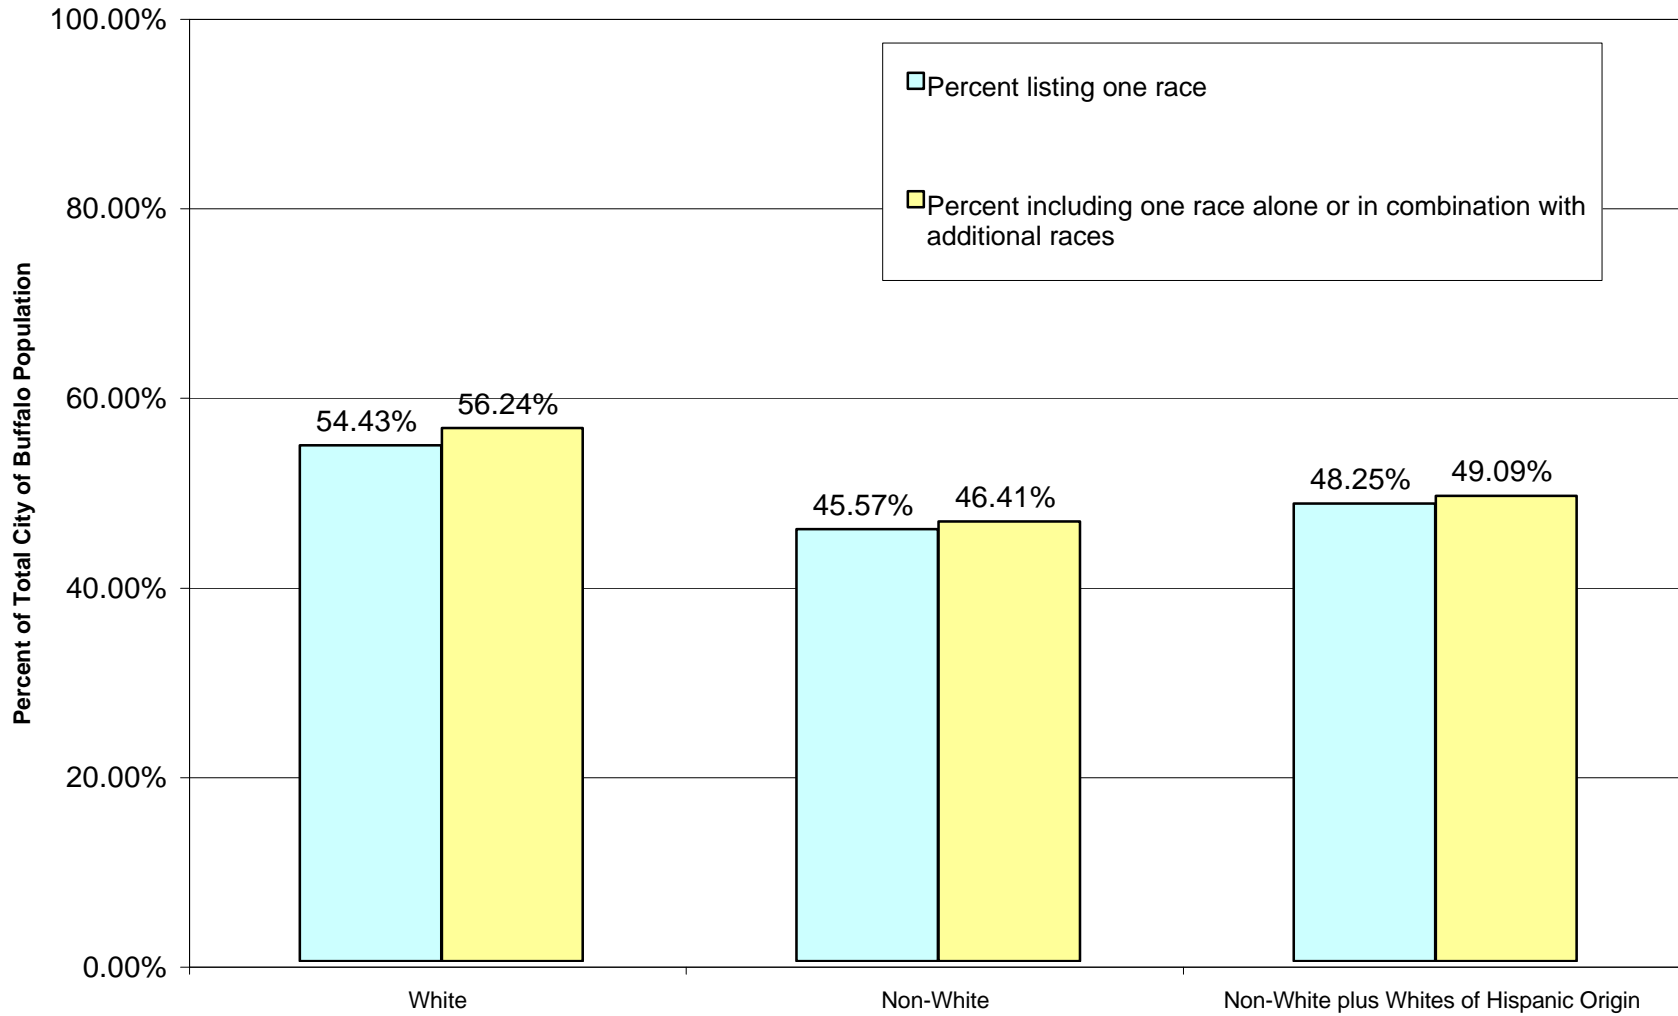

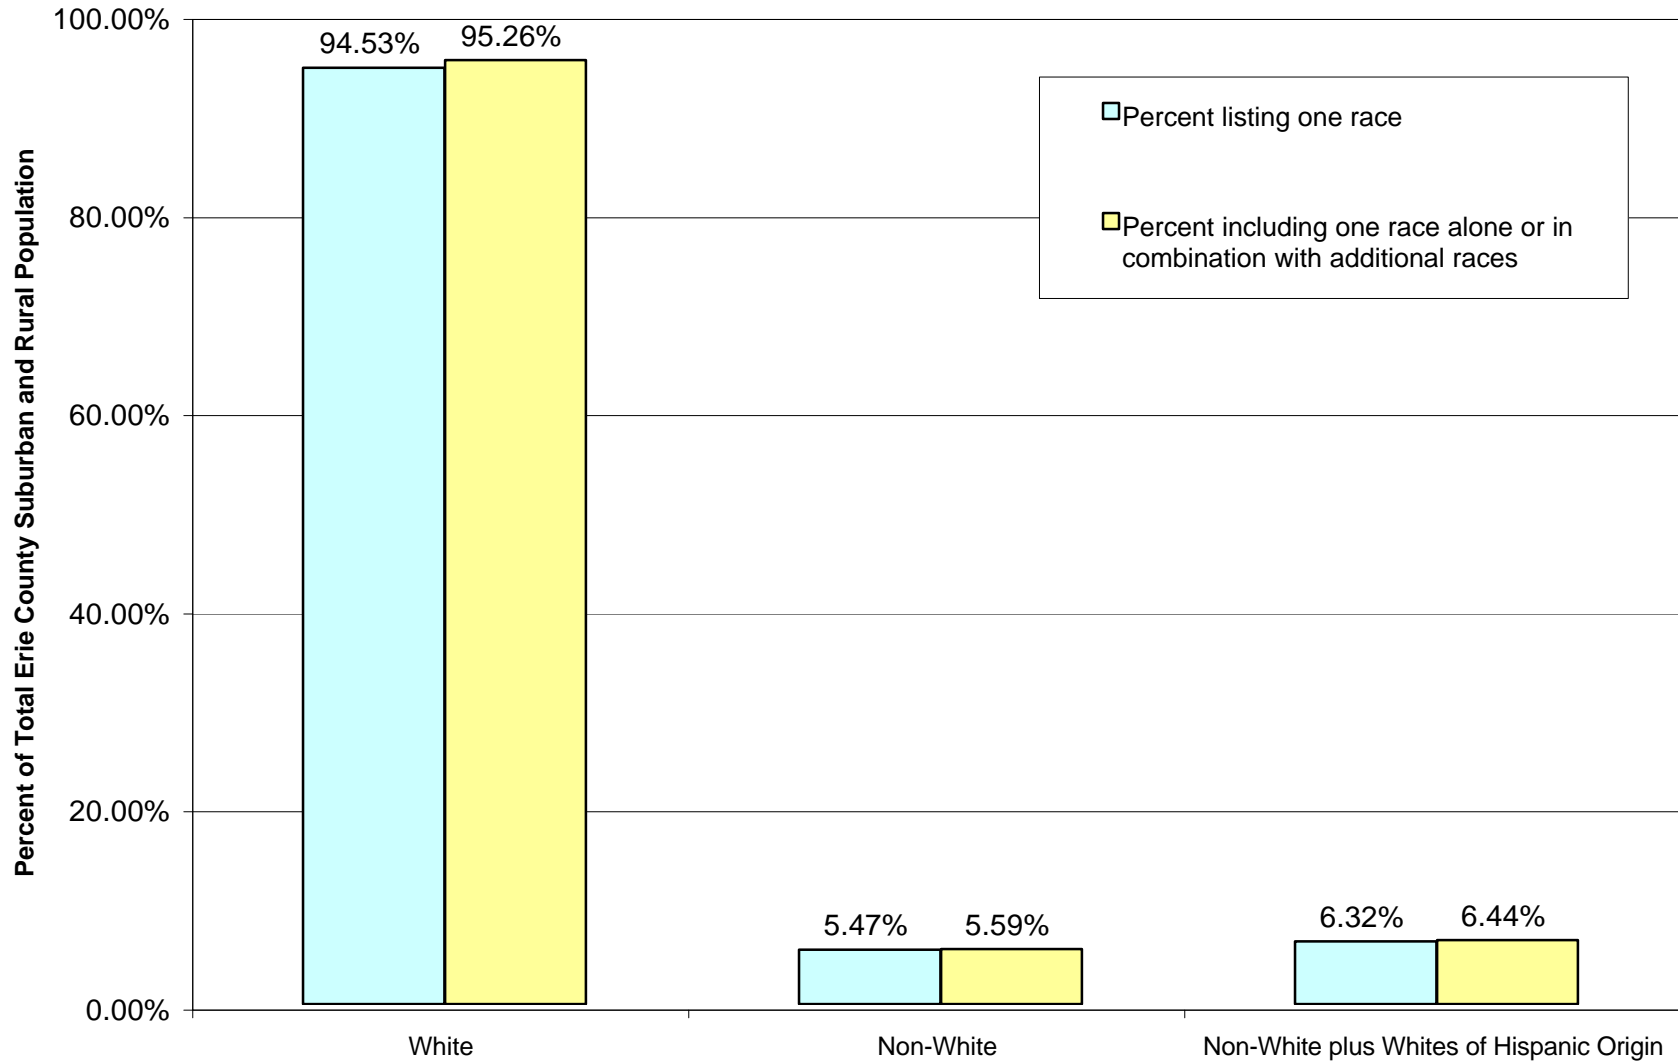

CHART 3C
Population by Race and Hispanic Origin for Suburbs of Erie County, 2000

FINDING 4: Population diversity is increasing in Erie County, including the City of Buffalo and the Inner Suburbs: the White Population of Erie County decreased from 1990 to 2000, although the Outer Suburban and Rural area of the County gained White residents. The Non-White population of Erie County increased, primarily within the City of Buffalo and the Inner Suburbs.

From 1990 to 2000, the Non-White population of Erie County increased while the City of Buffalo and the Inner Suburbs all experienced proportional gains in Non-White population due to both increases in the Non-White population and decreases in the White population.

As a percent of total population, the Non-White population of Erie County increased from 14.1% to 17.8 in 2000. This trend was generally reflected in the sub-areas of the county as the City of Buffalo moved from 35.3% percent Non-White in 1990 to 45.6% Non-White in 2000; the Non-White population in Suburban and Rural areas of the county increased from 3.2% to 5.5% in 2000.

All Inner Suburbs saw proportional gains in Non-White population. Cheektowaga moved from less than 2% to 5.1% Non-White in 2000; Amherst moved from 7% Non-white to 10.7% in 2000.; the Non-White population in Lackawanna gained 5 percentage points from 1990 to 2000, moving from 11% to 16% of the total population. The proportion of Non-White population in both Tonawanda and West Seneca doubled, although numerical gains were small.

From 1990 to 2000, the City of Buffalo and the Inner Suburbs of Erie County experienced a loss of White residents, while the Outer Suburban and Rural area of the County gained White residents.

From 1990 to 2000, the City of Buffalo lost 52,908 White residents, a 24.9% decrease.

During the same period, the Inner Suburbs lost 18,848 White residents.

The Outer Suburban and Rural portion of the County gained 20,569 White residents.

The City of Buffalo, the Inner Suburbs and the Outer Suburban areas of Erie County all experienced increases in Non-White and Hispanic population.

From 1990 to 2000, Erie County gained 32,920 Non-White residents, including: 17,433 in the City of Buffalo; 10,591 in inner suburbs; and 4,896 in outer suburbs.

The Hispanic population of Erie County increased by 9,985 from 1990 to 2000, a 47.4% increase, including: 6,789 in the City of Buffalo; 1,352 in Inner Suburbs and 1,844 in the Outer Suburban and Rural portion of the County.

FINDING 5: Patterns of gains and losses in population by race by Census Tract suggest sprawling movement of the White population, movement away from core areas of the City of Buffalo by the African-American population, and growth in the Hispanic population on the west side of Buffalo.

Overall population levels posted relatively small gains and losses; however, the racial and ethnic geographic distribution of the population is changing rapidly.

While the net change in Erie County population was a loss of 18,267 persons, the pattern of gains and losses in population by race at the Census Tract level indicate rapid changes among different racial and ethnic population groups. Change in population by Census Tract indicates that Erie County as a whole lost 92,167 White residents and gained 40,980 White residents, for a net total loss of 51,187 White residents. Conversely, Census Tracts within Erie County lost 13,605 Non-White residents, but gained 46,525 Non-White residents, for a net increase of 32,920 Non-White residents.

For many Census Tracts within Erie County, net changes in total population do not reflect important changes in the racial and ethnic composition of the population within a Census Tract. For example, the total population of Census Tract 30 in the City of Buffalo posted a loss of just 10 persons between 1990 and 2000; however, the tract lost 1,495 White residents and gained 1,485 Non-White residents, including 1,297 African-American residents.

The pattern of increases and decreases in the White population within Census Tracts suggests that the White population of Erie County is moving away from both the City of Buffalo and the Inner Suburbs for fast-growing Outer Suburban and Rural areas.

Within the City of Buffalo, the White population decreased in 79 of 90 of Census Tracts.

Inner Suburbs also experienced widespread declines in White population. No Census Tract in Lackawanna gained White population and only one Census Tract in each of the Town of Tonawanda and West Seneca gained White population. Two Census Tracts in Cheektowaga gained White population, while eight Census Tracts within Amherst gained White population.

The Census Tracts showing the largest gains in White population were located in Outer Suburban and Rural areas, including Clarence, Lancaster, Orchard park and Hamburg.

The losses of White population in the City of Buffalo and Inner Suburbs along with gains in White population by Outer Suburban and Rural areas suggest an increased sprawling of the White population toward more distant areas of Erie County.

The pattern of increases and decreases in African-American population by Census Tract indicate movement away from core neighborhoods of the City of Buffalo toward outer neighborhoods of the City of Buffalo and Inner Suburbs.

Within the City of Buffalo, 26 Census Tracts experienced losses in African-American population. These losses were concentrated primarily in eastern central areas of the City. However, 6 Census Tracts gained more than 500 African-American residents and an additional 7 Census Tracts gained more than 1,000 African-American residents.

The Census Tracts that increased in African-American population were located primarily at the outer edge of the City, adjacent to Tonawanda, Amherst and Cheektowaga, and suggest

movement by the African-American population away from core areas toward border areas of the City.

There is also some evidence of African-American suburbanization, as most Census Tracts within the Inner Suburbs gained African-American population. One Census Tract in Cheektowaga gained more than 500 African-American residents and was the only Census Tract in an Inner Suburb that gained more than 500 African-American residents.

The overall pattern of gains and losses of the African-American population by Census Tract suggests movement away from core areas of the City of Buffalo in a northeast direction toward border areas of the City and the Inner Suburbs.

The Multiracial population within Erie County is located primarily within the City of Buffalo and the Inner Suburbs.

The Multiracial population – persons who identified with two or more races in the 2000 Census – has the greatest presence in the City of Buffalo where two Census Tracts contain more than 250 Multiracial persons each and an additional 25 Census Tracts contain more than 100 Multiracial persons each.

The Hispanic population in Erie County grew most quickly on the west side of the City of Buffalo.

Scattered areas throughout Erie County saw small increases and decreases in the Hispanic population.

The areas of greatest growth were in the City of Buffalo, where 73 of 90 Census Tracts saw an increase in the Hispanic population and 2 adjacent Census Tracts on Buffalo's west side gained more than 500 Hispanic residents.

The Town of Collins also gained more than 500 Hispanic residents, most likely due to the location of a correctional facility in that area.

**Population Increases and Decreases by
Census Tract for Multiracial Population**

Multi-racial Populations

FINDING 6: Most residents of Erie County and the City of Buffalo live in racially or ethnically segregated Census Tracts.

Most people in Erie County live in racially or ethnically segregated neighborhoods; about one-third of the Non-White and African-American populations within the City of Buffalo live in highly segregated Census Tracts.

In 2000, residents of one race group made up 90% or more of the population in 165 out of 236 Census Tracts in Erie County and 44 out of 90 Census Tracts in the City of Buffalo.

White persons make up about 82% of the population of Erie County as a whole; however, 147 Census Tracts in Erie County have White populations that are 90% or more of a tract's total population, accounting for nearly 80 percent of the total White population in Erie County. 19 of these Census Tracts are located within the City of Buffalo, representing more than a third of the White population within the City of Buffalo.

The Non-White population comprises about 18% of the County population and 46% of the population of the City of Buffalo; however, in 18 Census Tracts in Erie County (all in the City of Buffalo) the Non-White population is 90% or more of a tract's total population, accounting for 48,517 Non-White persons (28.7 percent of all Non-White persons in Erie County and 36.4 percent of all Non-White persons in the City of Buffalo).

In 13 Census Tracts, all located within the City of Buffalo, the African-American population represents 90% or more of a tract's total population, accounting for 33,997 African-American persons (27.5 percent of all African-American persons in Erie County and 31.2 percent of all Non-White persons in the City of Buffalo).

The Hispanic population constitutes a majority population in just one Census Tract, located in the City of Buffalo, accounting for 2,524 persons of Hispanic Origin.

There are only four Census Tracts in Erie County where no single racial or ethnic group constitutes a majority population. Three of these Census Tracts are located in the City of Buffalo and one is located in Lackawanna.

Overall, the number of people living in highly segregated neighborhoods has decreased from 1990 to 2000; however, the number of Non-White persons living in highly segregated Census Tracts increased and the number of African-American persons living in significantly segregated Census Tracts also increased.

From 1990 to 2000, both the total number of people living in highly segregated Census Tracts and the number of highly segregated Census Tracts decreased.

For Erie County as a whole, the number of Census Tracts that are 90% or more White decreased by 19 from 166 to 147. These Census Tracts accounted for 85.5 percent of the White population in 1990 and account for 79.4 percent of the White population in 2000, although the White population in these tracts fell from 711,166 in 1990 to 620,423 in 2000.

Within the City of Buffalo, the number of Census Tracts that are 90% or more White decreased from 31 to 13. These Census Tracts accounted for 53.7 percent of the White population in 1990 and 34.7 percent of the White population in 2000, although the White population in these tracts fell from 114,020 in 1990 to 55,302 in 2000.

The number of Census Tracts that are 90% or more Non-White increased to 18, all of which are located in Buffalo. The proportion of all Non-White residents of the City of Buffalo living in these

tracts fell from 39 percent to 36.4 percent; however, the Non-White population of these tracts actually increased from 45,238 to 48,517 in 2000.

There are 13 Census Tracts, all located in the City of Buffalo, where the African-American population makes up 90% or more of the total population, a number that is unchanged from 1990 to 2000; however, the number of African-Americans living in these Census Tracts fell from 44,908 to 33,997, a decrease from 44.6 to 31.2 percent of the total African-American population in the City of Buffalo.

However, both the number of Census Tracts and the number of African-American persons living in Census Tracts that are 50% or more African-American increased from 1990 to 2000. While African-Americans comprise about 37% of the population of the City of Buffalo in 2000, nearly 80% of the African American population lives in Census Tracts that are 50 percent or more African-American. Compared to 1990, this represents an increase of 11,434 African-American residents living in significantly segregated Census Tracts within the City of Buffalo.

FINDING 7: More than a third of Census Tracts in the City of Buffalo experienced a significant change in racial or ethnic composition from 1990 to 2000.

More than a third of all Census Tracts in the City of Buffalo experienced substantial change in racial or ethnic composition from 1990 to 2000.

Between 1990 and 2000, 7 Census Tracts that were majority African-American in 1990 became more segregated as the proportion of African-American residents increased by year 2000.

2 Census Tracts that had no racial majority in 1990 became segregated in 2000 as the African-American population increased to represent more than 50% of the tract's total population.

7 Census Tracts that had a majority White population in 1990 have an African-American majority population in 2000. These tracts are generally located at the northeastern outer edge of the City of Buffalo and reflect the movement of the African-American population away from central areas within the City, as well as movement of the White population away from the City of Buffalo.

15 Census Tracts in Buffalo remained majority White; however, the proportion of White residents decreased. These tracts are located mostly in the northwest and northern edge areas of the City.

2 Census Tracts that had a majority White population in 1990 became integrated in 2000 where no single racial group represents a majority population.

2 Census Tracts that had a majority White population in 1990 experienced an increase in the proportion of White residents to 2000.

Several Census Tracts in Inner Suburbs also experienced significant change in racial composition.

9 Census Tracts in Inner Suburbs remained majority White, but the proportion of White residents decreased, including: one tract in Tonawanda, two tracts in Cheektowaga and six tracts in Amherst. These tracts are generally located near the northeastern borders of the City of Buffalo and may reflect suburbanization of the Non-White and African American population.

1 Census Tract in West Seneca that was majority White in 1990 experienced an increase in the proportion of White residents to 2000.

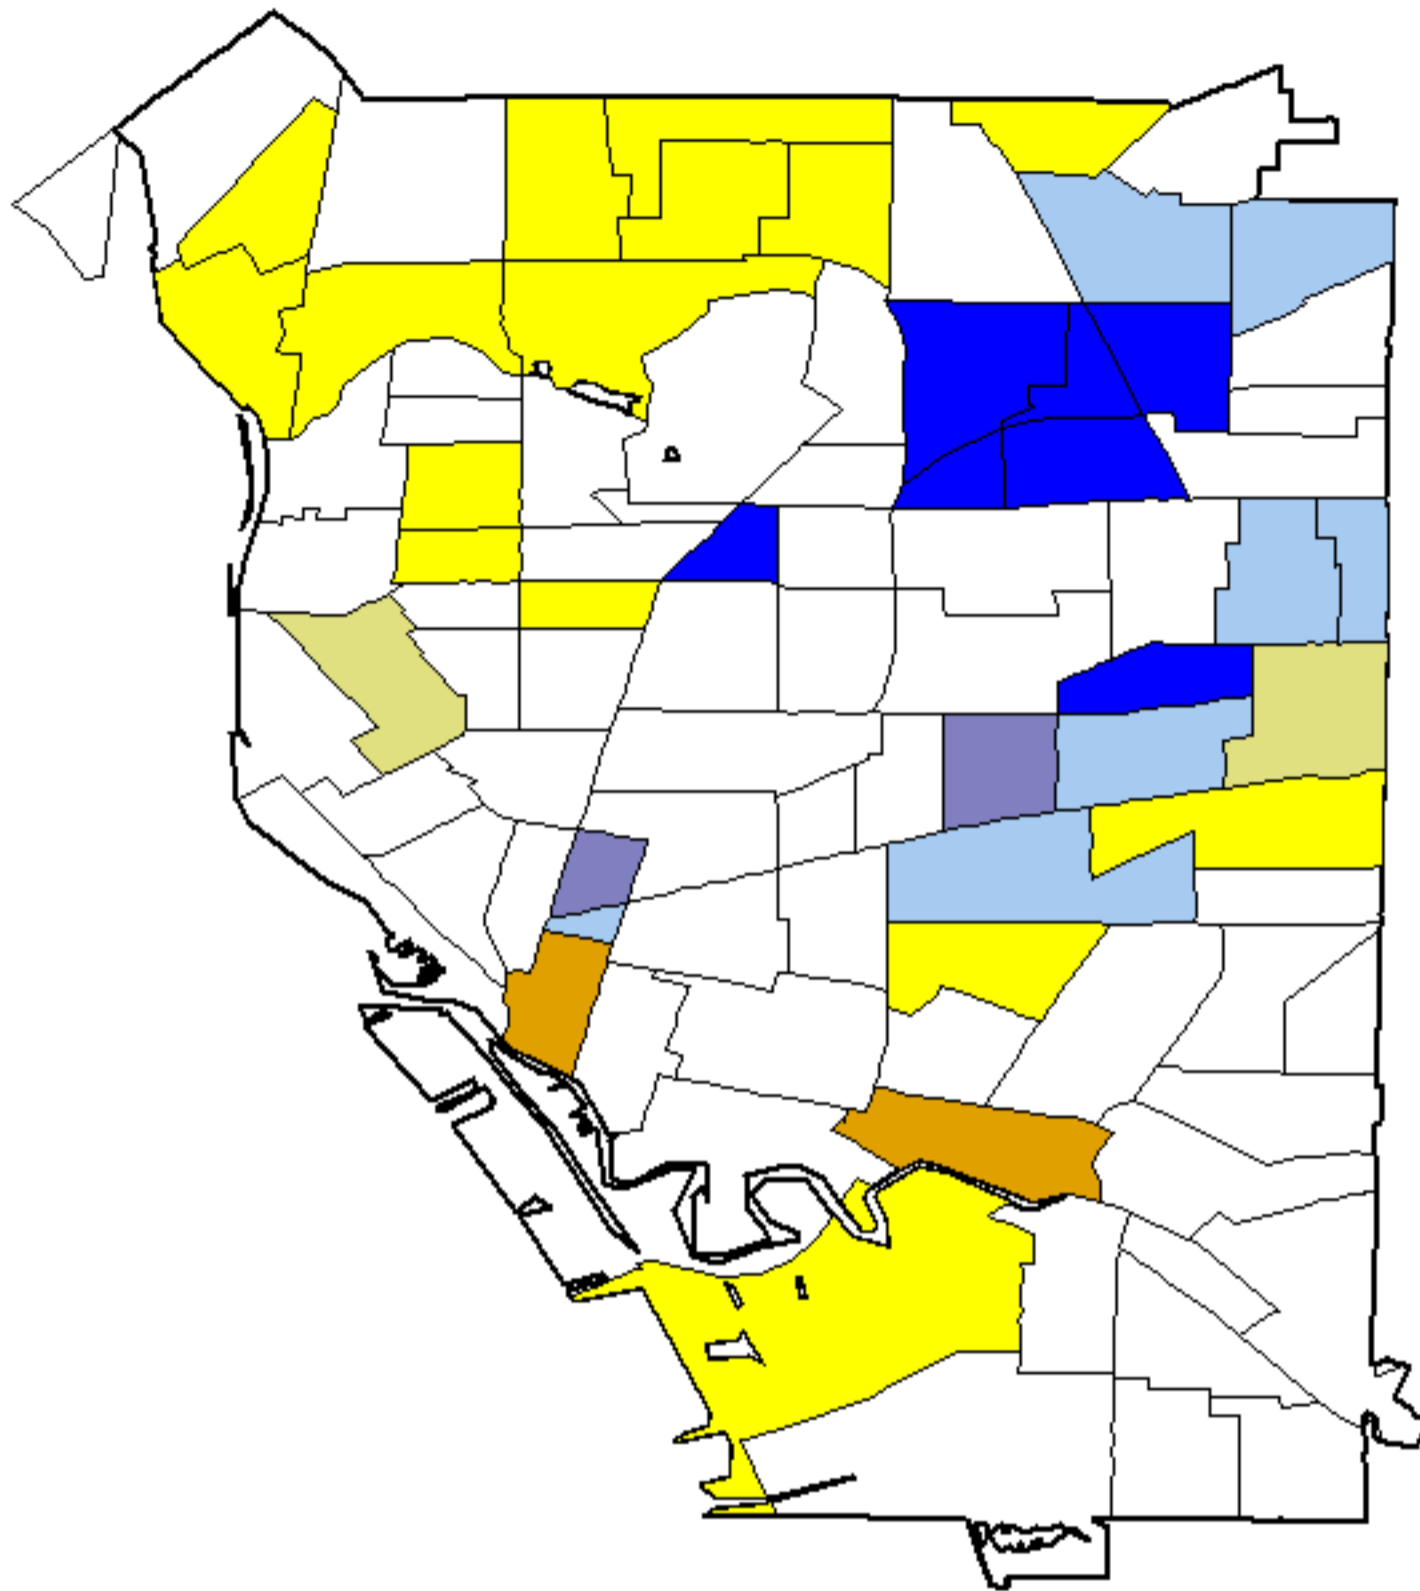

1 Census Tract in Lackawanna that had a majority White population in 1990 became integrated in 2000 where no single racial group represents a majority population.

There was no significant racial or ethnic change in the Outer Suburban and Rural areas of Erie County.

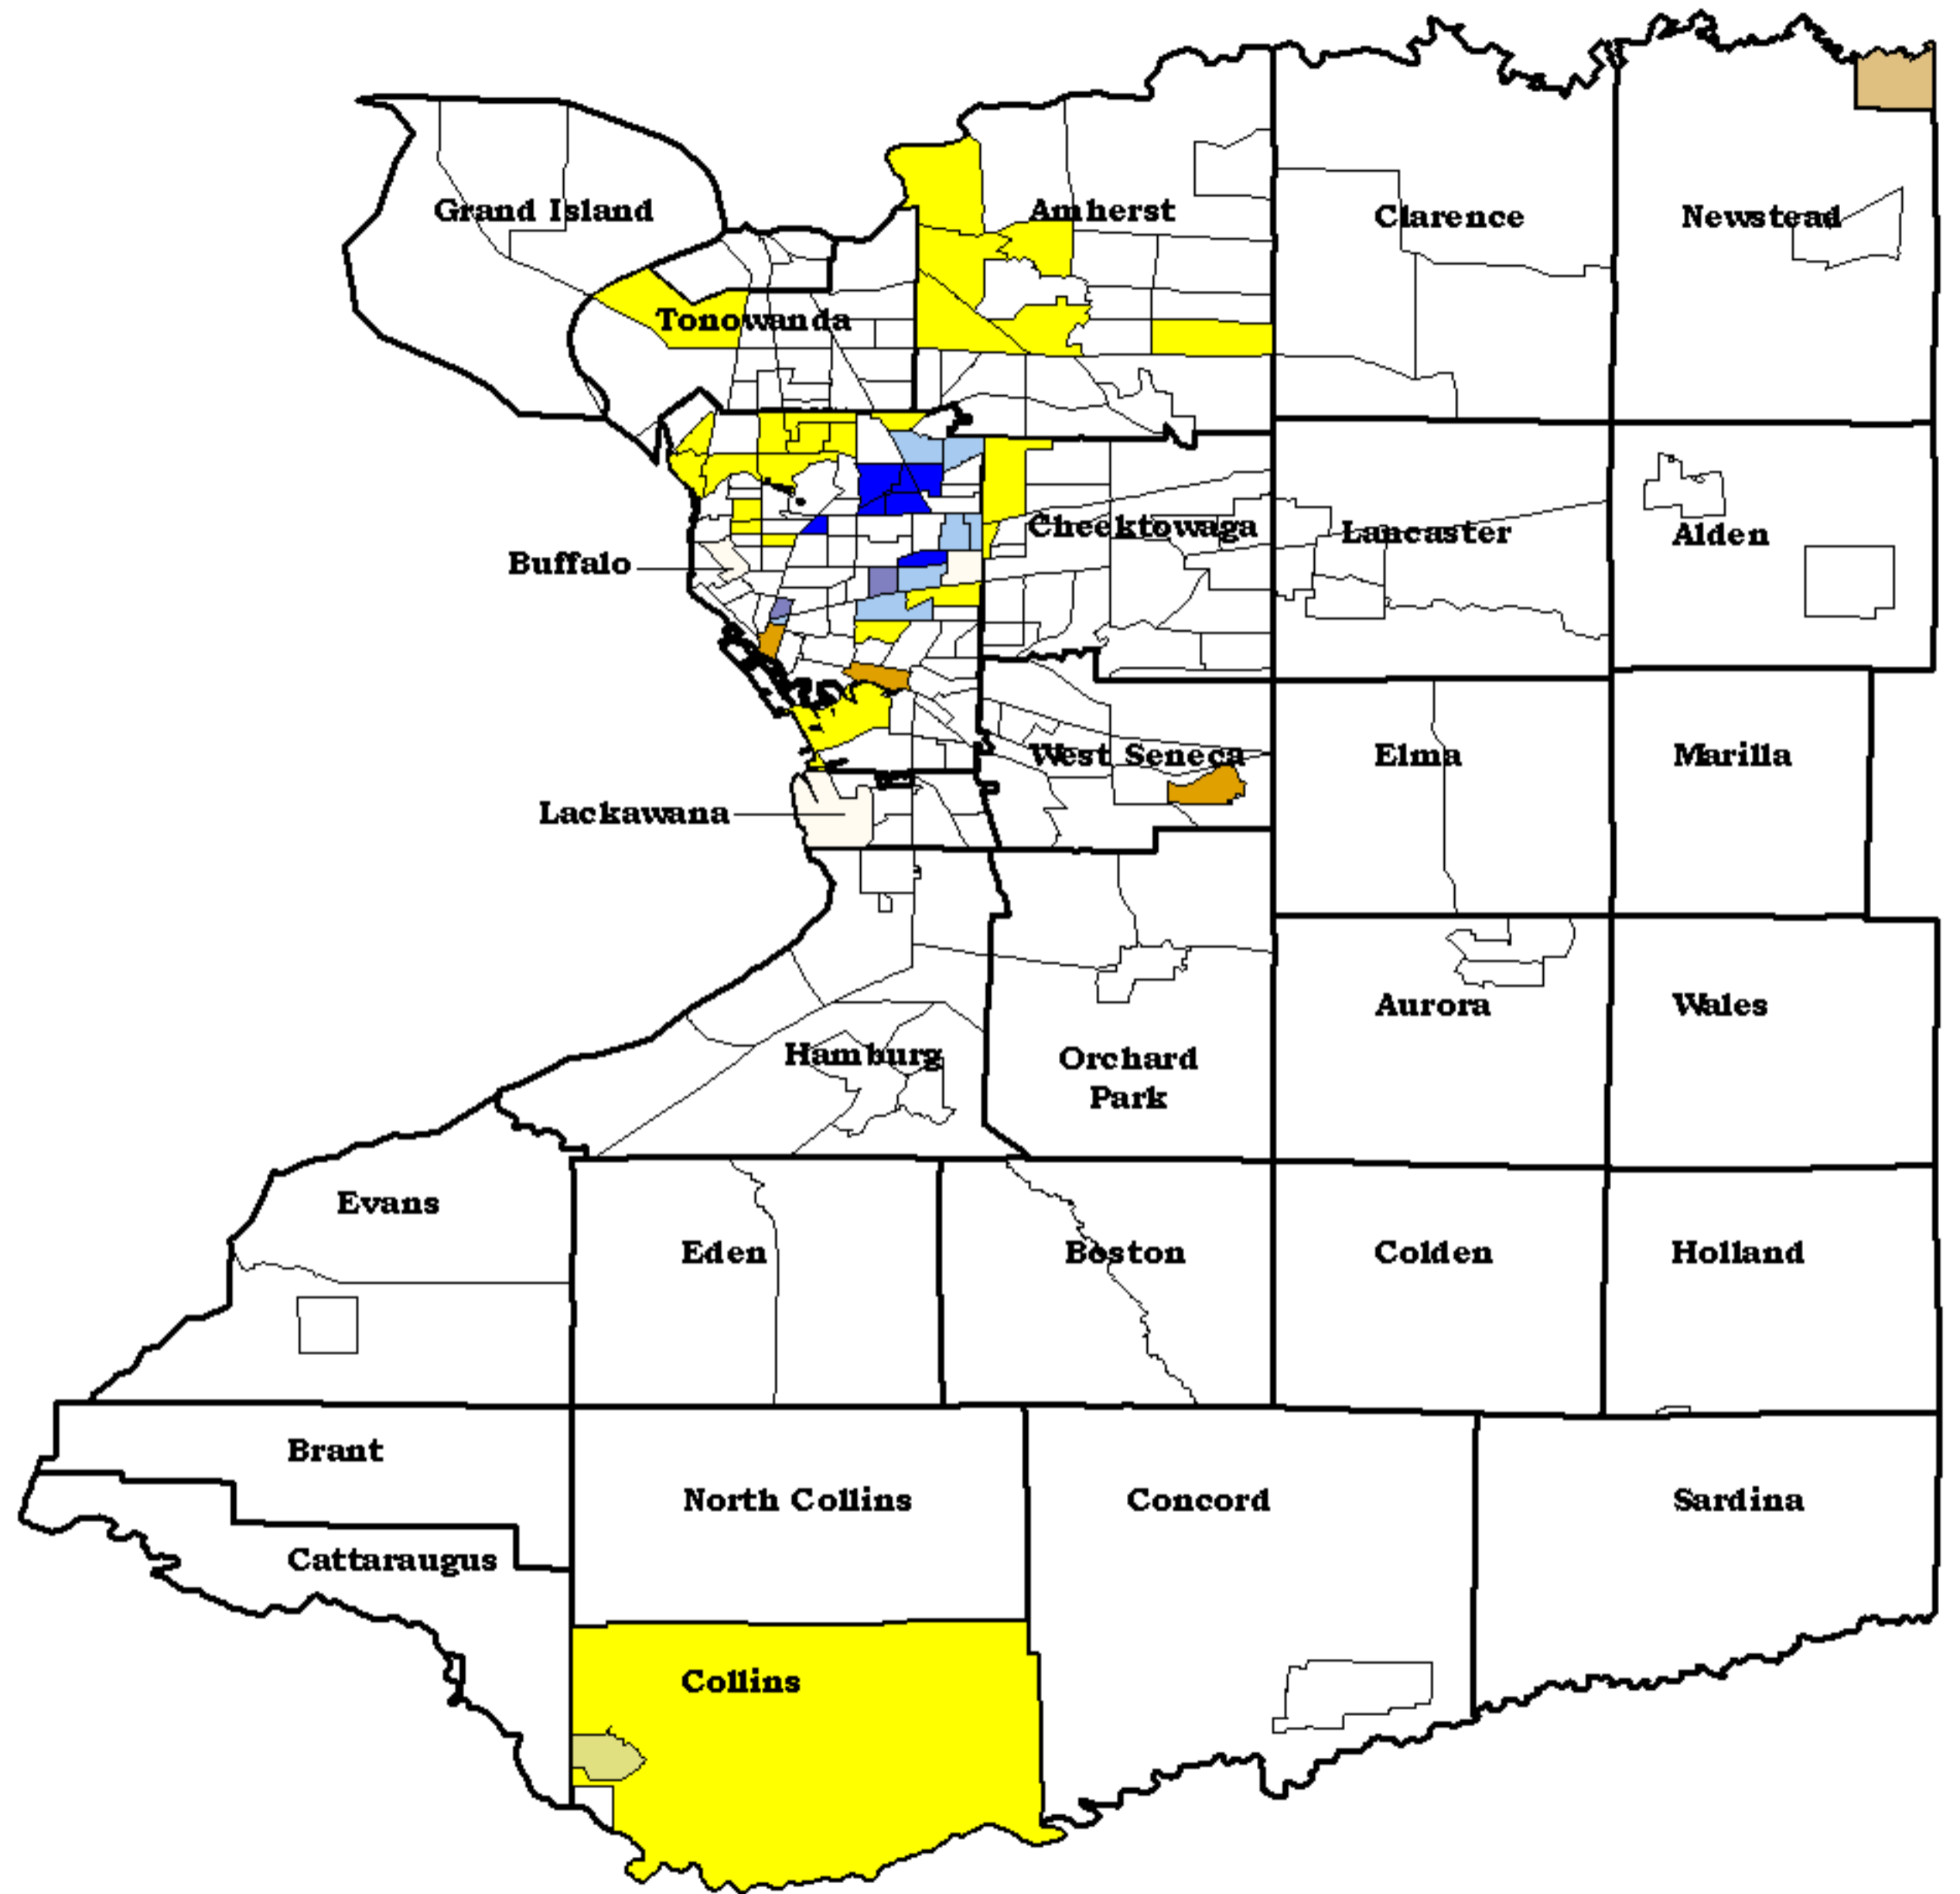

Only three Census Tracts in Outer Suburban and Rural areas experienced significant racial or ethnic change; however, all three are special cases. Changes in two Census Tracts in Collins are likely due to changes in the correctional facility population and changes in the Tonawanda Reservation Census Tract represent a shift in population from ten persons identified as Native American in 1990 to ten persons identified as White in 2000.

FINDING 8: Racial and ethnic segregation in Buffalo and Erie County has improved only slightly from 1990 to 2000, despite significant population movement.

A measurement known as the Index of Dissimilarity is frequently used by sociologists to determine the level of segregation of specific racial or ethnic groups. A value of 0 indicates a complete non-segregation, while a value of 100 indicate complete segregation.

Historically, the City of Buffalo and the Buffalo region has been among the 10 most racially segregated areas in the US.

The African-American population is the most segregated racial group, although their segregation has decreased modestly in all regions of Erie County.

From 1990 to 2000, the Index of Dissimilarity for the African-American population fell from in Erie County decreased modestly from 71.6 to 67.0, indicating that the African-American population in Erie County is currently somewhat less racially isolated versus 10 years ago.

Within the City of Buffalo, the Index of Dissimilarity for the African-American population fell from 49.4 to 42.5.

The Index of Dissimilarity for the African-American population also decreased in the Suburban and Rural regions of Erie County, including the Inner Suburbs and Outer Suburban and Rural areas, reflecting the movement of the African-American population away from the central city toward suburban areas.

The segregation of the Hispanic population continues to be substantial, but has decreased slightly from 1990 to 2000 in all regions of Erie County

From 1990 to 2000, the index of Dissimilarity for the Hispanic population in Erie County as a whole fell from 55.6 to 50.2.

Within the City of Buffalo, the Index of Dissimilarity for the Hispanic Population decreased from 54.2 to 46.8.

The Index of Dissimilarity for the Hispanic population also decreased in the Suburban and Rural regions of Erie County, reflecting both the movement of the Hispanic population away from the central city toward suburban areas, as well as an influx of Hispanic residents to the region between 1990 and 2000.

Segregation of the White population increased in all areas of Erie County, reflecting the movement of the White population away from both the central city and the Inner Suburbs towards the Outer Suburban and Rural areas of Erie County.

For Erie County as a whole, the Index of Dissimilarity for the White population rose from 10.4 in 1990 to 12.3 in 2000.

Within the City of Buffalo, the Index of Dissimilarity for the White population rose from 23.0 to 27.8 between 1990 and 2000.

The Index of Dissimilarity for the White population increased slightly in the Suburban and Rural regions of Erie County, including the Inner Suburbs and the Outer Suburban and Rural areas between 1990 and 2000.
